Derek McQuay

Security Software Engineer at Apple
San Francisco Bay Area

Experience

Apple
Security Software Engineer
September 2018 - Present (8 years)
Cupertino, CA

Tigera, Inc.
Software Engineer
May 2018 - September 2018 (5 months)
San Francisco Bay Area

Tigera provides Zero Trust network security and continuous compliance for Kubernetes platforms.

Tigera Secure Enterprise Edition extends enterprise security and compliance controls to Kubernetes environments with support for on-premises, multi-cloud, and legacy environments. Tigera Secure Cloud Edition is available on the AWS marketplace and enables fine-grained security and compliance controls for Kubernetes on AWS and Amazon EKS.

Tigera powers all of the major hosted Kubernetes environments including Amazon EKS, Azure AKS, Google GKE, and IBM Container Service. Tigera is also integrated with the major on-premises Kubernetes deployments and is shipped “batteries included” in Docker EE and fully integrated with Red Hat OpenShift.

Tigera Secure builds on leading open source projects: Kubernetes, Calico, and Istio, which Tigera engineers maintain and contribute to as active members of the cloud-native community. Our employees are experts in securing Kubernetes and our technology is deployed in the largest SaaS, financial services, gaming, and retail companies where security and compliance are critical to the business.

Mesosphere, Inc.
Software Engineer
March 2017 - May 2018 (1 year 3 months)

San Francisco Bay Area

Member of the DC/OS Kubernetes team building "Kubernetes As A Service" on top of DC/OS.

As one of the founding team members, brought the project from a Proof of Concept to GA in under a year. Involved in various aspects of the project from initial design and implementation to owning the CI and Cloud Native Computing Foundation (CNCF) Certified Kubernetes Conformance Program for the DC/OS Kubernetes offering.

Apprenda

Software Engineer

October 2016 - March 2017 (6 months)

Dublin, California

Member of the OSS Kubernetes team where I spent my time working on upstream Kubernetes. Currently focused on working with SIG-Cluster-Lifecycle.

Became a Top100 contributor to Kubernetes with over 60+ commits.

Lawrence Livermore National Laboratory

HPC System Engineer

May 2015 - September 2016 (1 year 5 months)

Livermore, CA

Configure, install, and maintain HPC systems and develop tools to ease in administration of HPC clusters. Charged with investigating new technologies and determining application for use in an HPC work flow. This includes facilitating use for customers on new technology clusters (Big Data, GPU, etc.). Participate in LLNL Security Task Force to determine potential risk and concerns related to security pertaining to HPC clusters and associated infrastructure.

Fulton Supercomputing Lab BYU

Applications Assistant

August 2013 - May 2015 (1 year 10 months)

Worked with faculty and research students to configure, install, and optimize software. Aided in the building of custom software from source (configure, makefile, compiler optimizations, etc.). Performed trainings to users and helped convert their work flow to a HPC environment.

Patent Portfolio Builders

Intern

May 2014 - August 2014 (4 months)

Fredericksburg, VA

Potomac Patent Group

Intern

May 2013 - August 2013 (4 months)

Fredericksburg, VA

Education
