

# VICTOR HERNANDEZ GUZMAN

victormh@outlook.com | 425-269-8940 | [www.linkedin.com/in/victormhgz](https://www.linkedin.com/in/victormhgz)

## PRINCIPAL SOFTWARE ENGINEER

*Expertise in Identity & Access Management (IAM) | Hyperscale Cloud Infrastructure*

Seasoned technical leader with over 20 years of experience, including 15+ years specializing in Identity and Access Management (IAM). Proven track record of designing and implementing high-scale identity providers and integrating them across global platforms and service providers. Expert in architecting distributed, service-oriented, and microservice systems for hyperscale environments, with strong technical expertise in OAuth, SAML, SCIM, and OpenID.

## PROFESSIONAL EXPERIENCE

*DOCUSIGN | Principal Software Engineer*

December 2024 – Present

- **Architectural Strategy:** Serve as a technical leader across the Identity organization, defining the long-term architectural roadmap for core authentication and authorization systems.
- **Security Modernization:** Orchestrate large-scale initiatives to strengthen global security posture through platform modernization and complex migration projects.
- **Identity Evolution:** Led the architectural transition to passwordless authentication, balancing high-security compliance requirements with frictionless user experience.
- **Technical Governance:** Act as the primary Architecture Owner, mentoring senior engineers and establishing cross-functional design standards to ensure system scalability.

*MICROSOFT | Principal Software Engineer*

February 2022 – December 2024

- **Hyperscale Infrastructure:** Provided architectural leadership for the Datacenter Secure Token Server (STS), the foundational identity provider supporting the global Azure ecosystem and Azure AD.
- **System Resiliency:** Designed and maintained mission-critical authentication capabilities, ensuring high availability and fault tolerance for bare-metal identity services at a global cloud scale.

- **Standardization & Protocols:** Partnered with security and platform engineering teams to drive enterprise-wide improvements in identity protocols and service reliability.
- **Engineering Excellence:** Established "secure-by-design" practices and mentored engineering cohorts to raise the bar for technical excellence across the organization.

#### *SALESFORCE | Lead Software Engineer*

May 2019 – February 2022

- **Identity Consolidation:** Spearheaded the architectural design of a unified global Identity Provider (IdP) aimed at consolidating fragmented identity systems following corporate acquisitions.
- **Distributed Data Synchronization:** Led the critical first phase of IdP integration by architecting the synchronization of datastores across multiple acquired platforms.
- **Large-Scale Integration:** Managed the technical ownership of authz/authn standards (OAuth, SAML, SCIM, and OpenID) supporting the integration of 8 million client applications.

#### *MICROSOFT | Senior Software Engineer*

September 2009 – May 2019

- **Pioneering Passwordless Architecture:** Architected and delivered the industry's first implementation of passwordless authentication utilizing public key credentials (WebAuthn/FIDO).
- **Cross-Ecosystem Integration:** Led the complex integration of the Microsoft Account identity system across Windows Core, Xbox One, HoloLens, and Windows 8/10.
- **Security Innovation:** Engineered and scaled advanced authentication modalities, including QR Code-based session authentication and push-notification-based identity verification.

## TECHNICAL SKILLS

**Architectural Domains:** Identity & Access Management (IAM), System Design, Zero Trust, Distributed Systems, Cloud-Native Architecture, High Availability, Disaster Recovery.

**Protocols & Standards:** OAuth, SAML, SCIM, OpenID Connect, WebAuthn, FIDO.

**Leadership:** Technical Leadership, Architecture Ownership, Geo-distributed Team Management, Engineering Governance.

## EDUCATION

B.S. Computer Science, Instituto Tecnológico y de Estudios Superiores de Occidente (ITESO)
